## Engagements

---

### U.S. Small Business Administration

Office of Investment & Innovation

Analyticx provides portfolio performance operations support to SBA's Office of Investment and Innovation, which administers the Small Business Investment Company (SBIC) program and the SBIR and STTR programs known as America's Seed Fund.

Our work covers program and project management and consolidated operational reporting across the Investment and Innovation divisions; financial analysis and portfolio performance reporting, including budget tracking, interagency agreement support, and grants management; data infrastructure, dashboards, data governance, and the analytical products behind OII's statutory reporting to Congress; due diligence and program integrity risk analysis, including research supporting Foreign Ownership, Control, and Influence screening; and stakeholder engagement, communications, training, and event coordination across the SBIR/STTR community and the eleven participating federal agencies.

Analyticx has held this work since May 2024.

## U.S. Small Business Administration

Office of Entrepreneurial Development

Through a succession of awards beginning in 2018, Analyticx delivered and supported digital learning platforms, online training content and resources, and technology solutions for SBA's entrepreneurial development programs. Our work included learning platform delivery and operations and the development and maintenance of online learning tools and content for entrepreneurs and small businesses nationwide.

Separately, Analyticx supported SBA's transition from legacy systems to the Nexus platform, providing data migration, reporting, and technical support for the agency's CRM and program data environment.

## U.S. Department of State

Bureau of Educational & Cultural Affairs — Office of Alumni Affairs

Analyticx supported the Office of Alumni Affairs, which sustains the Department's relationships with the millions of alumni of U.S. government exchange programs worldwide.

Our work spanned program management, online platform development, and the integration of the office's alumni data and archive into Salesforce, alongside communications strategy and story distribution, alumni engagement training, and graphic design services. The engagement included website migration, digital strategy and governance, business and systems analysis, and data processing and analytics in support of a unified alumni portal and a consistent user experience across the office's public-facing platforms.

---

## U.S. Department of State

Bureau of Educational & Cultural Affairs — Cultural Heritage Center

Analyticx provided technology, digital services, and program support for U.S. cultural heritage protection initiatives worldwide. Our work included the procurement and development of a Digital Asset Management System (DAMS), software and digital platform support, and the planning and execution of virtual and global events engaging stakeholders across the United States and internationally.

## U.S. Food and Drug Administration

Center for Food Safety & Applied Nutrition

Analyticx provides critical business functions support across CFSAN's program offices. The center regulates the safety of the nation's food supply, dietary supplements, infant formula, and cosmetics, with oversight of more than 377,000 registered food facilities in the United States and abroad. Our work covers executive and administrative support to center leadership, management analysis, ethics program support, and organizational documentation.

Analyticx personnel conduct research and analytical studies and prepare reports, briefings, and recommendations for leadership; develop and edit correspondence, memoranda, and supervisory communications; manage scheduling, meeting coordination, document tracking, and content posted to the center's intranet and public website; support the ethics program, including tracking and review of confidential financial disclosure and outside activity filings in coordination with FDA's Office of Ethics and Integrity; and research, draft, and standardize position descriptions consistent with Title 5 and Title 21 requirements in support of organizational planning.

## U.S. General Services Administration

Technology Transformation Services — Public Experience Portfolio

Analyticx supports GSA's Public Experience portfolio, which manages the federal government's principal public-facing digital properties — USA.gov, vote.gov, Search.gov, the USAGov Benefit Finder, and the PX Contact Center. Together these products serve more than 100 million users a year and carry urgent federal information to the public during national emergencies.

Our work spans web quality assurance and Section 508 accessibility compliance, content design and strategy, user experience research, data analysis and performance reporting, outreach and public engagement, contact center quality assurance, and project and program management. Analyticx personnel test and remediate accessibility against WCAG standards using assistive technology, develop and publish content in a Drupal-based content management environment, conduct usability testing and customer journey mapping, and report on product performance using Google Analytics, BigQuery, Looker Studio, and Tableau.

## Office of the Secretary of Defense

Cost Assessment & Program Evaluation (CAPE)

Analyticx provides audiovisual engineering, integration, and operations support for CAPE's secure conference, briefing, and collaboration environments at the Pentagon and Mark Center.

Our work spans the full A/V lifecycle, including conference room design and engineering, system installation and integration, room modernization and technology upgrades, preventive and ongoing maintenance, emergency troubleshooting and repair, and day-to-day operational support. Cleared technical staff support mission-critical spaces and help ensure systems remain reliable, secure, and ready for high-level meetings and briefings.

**Secure communications & A/V**

---

## Joint Force Headquarters — National Capital Region

U.S. Army Military District of Washington (JFHQ-NCR/MDW) — The U.S. Army Aviation Brigade (TAAB)

Analyticx provides IT, communications, and technical support across JFHQ-NCR/MDW, including direct support to The U.S. Army Aviation Brigade (TAAB). Our work includes systems administration, network engineering and operations, hardware and software support, system configuration and troubleshooting, and ongoing technical support for mission-critical IT and communications environments across secure and unclassified networks.

---

## U.S. Army Corps of Engineers

CIO / G-6

Analyticx provided information technology, communications, and operational support to USACE CIO/G-6, supporting enterprise services and the infrastructure and processes behind them. Our work included IT and communications support, business process analysis and improvement, and the development and documentation of processes, procedures, and workflows to improve consistency, efficiency, and service delivery across the organization.

**Infrastructure & operations**

---

## Headquarters, Department of the Army

Office of the Deputy Chief of Staff, G-4

Analyticx provided comprehensive IT and technical support to the Army G-4, supporting the systems, networks, and users essential to its mission. Our work included systems and network administration, systems engineering, help desk and end-user support, hardware and software support, cybersecurity, and Risk Management Framework (RMF) activities.

Analyticx personnel supported day-to-day IT operations, system configuration and troubleshooting, network performance and availability, security and compliance requirements, and the ongoing maintenance of mission-critical technology environments.

**Infrastructure & operations**

---

## Cleared delivery in classified environments

Analyticx engineers unified communications, video teleconferencing, and audiovisual systems across NIPR, SIPR, and JWICS enclaves under a Top Secret Facility Security Clearance. If your requirement touches a classified enclave, this is the part of our portfolio to ask us about.
